

System and Project Engineer

For many years Munich based STT-SystemTechnik GmbH has very successfully designed, developed and manufactured highly reliable radio frequency data transmission systems and antennas for industry, aerospace and space. Our equipment and systems operate reliable in many different applications worldwide -and even in the vastness of the universe- under very harsh environmental conditions.

To strengthen our team, we are currently looking for a System and Project Engineer joining us at the earliest possible date.

Your areas of responsibility would include:

- Design, analysis and dimensioning of communication systems for satellite applications
- Evaluation of customer requirements and their feasibility
- Supervision, control and management of subcontractors and suppliers
- Planning, preparation and monitoring of project plans taking into account available resources and customer requirements
- Project interface to the customer
- Planning, coordination and control of the project team
- Preparation and maintenance of documentation (proposal documents, statement-of-conformance, specifications, reports, analyses, design descriptions, etc.)

We would expect a degree in electrical engineering, physics or any equivalent qualification and extensive working experience in the systems engineering area and project management within the space market. You should have detailed and well-founded knowledge in project management, budget planning, risk management and scheduling, as well as detailed knowledge of relevant guidelines and standards of industry and aerospace. Extensive experience in leading project teams, an analytical mindset for early detection of problems and practical skills in compiling of solutions, as well as strong negotiating skills and a logically structured working method would be required. In-depth knowledge in MS Office programs would be much appreciated.

We count on your strong motivation and dependableness, high awareness for quality, the ability to work both independently and within a team, as well as good organizational skills, creativity and stress resistance. You should also be fluent in spoken and written German and English.

We offer a very interesting, multinational and highly innovative working environment with diversified tasks, where you can successfully bring in your knowledge, experience, ideas and your passion for product assurance and EEE-components. Join our extraordinary team and shape forward-looking innovations together with us.

If you feel addressed and if you think this job is what you've been looking for, please send us your detailed application stating the earliest date you could start and your salary expectations.
